**Project Title:** RESOURCE SUPPORT DEVELOPMENT UNDER THE PAGGURUFUNAN PARA TA PROGRESO  
**Location:** TAYTAY BAGGAO, CAGAYAN  
**Proponent:** DEPARTMENT OF CIVIL ENGINEERING

**Rationale:**

The Cagayan State University being one of the state universities of the Philippines continues to fulfill its mandate by achieving excellence in instruction, conduct of various researches, and involvement in community empowerment through various research-based extension programs. The College of Engineering and Architecture is one of the largest colleges in its Carig Campus in terms of faculty and student population. Throughout the years, the College has launched various extension activities which aims to help Cagayano communities to become resilient and help them attain sustainability.

The CSU Carig Campus through the leadership of Engr. Arthur G. Ibanez has launched the extension program entitled “Paggurufunan para ta Progreso”. One of the objectives of this extension program is to provide assistance to the residents of Salinong ni San Jose Relocation Site located in Barangay Taytay in Baggao Cagayan. This is in partnership with the Salinong project of the St. Joseph the Worker Parish and St. Joseph College of Baggao Inc.

The College of Engineering and Architecture is assigned to the Resource Support Development project wherein under this project, the college is expected to assist the beneficiaries by providing technical assistance in the improvement of their community. Last year, the college of engineering was able to install solar power system in the area and is expected that more units shall be installed in the coming years. The aforementioned extension program has been awarded with 650,000 budget by the CSU central administration.

Currently, there are almost 60 households residing in the area with four (4) artesian wells where the residents sourced out their water for their day-to-day activities. The community also have their multi-purpose hall donated by private NGO as sanitary bathrooms.

The municipality of Baggao is one of the largest municipalities in the province of Cagayan in terms of land area. It is located on the northeastern part of the Philippine archipelago. According to Philippine Atmospheric, Geophysical, and Atmospheric Services Administration (PAGASA), there is an average of twenty (20) typhoons that enters the Philippine Area of Responsibility (PAR) annually, this is primarily due to the location of the Philippines. In addition, the Philippine archipelago lies along the so-called “Circum-Pacific Belt” or the “Pacific Ring of Fire” which is a long horseshoe-shaped seismically active belt of earthquake epicentres, volcanoes, and tectonic plate boundaries that fringes the Pacific basin (Britannica.com).

Flooding, Earthquakes, and Landslides are the three of the most devastating natural disasters that is common in the Philippines and the impacts of these natural disasters are devastating to the economy. Multiple hazards brought by natural events affect public infrastructure, including roads, bridges, water and power utilities, hospitals and schools, government buildings, and agriculture. In 2021 alone, Super Typhoon Kiko and Odette caused massive disruptions in multiple cities and provinces, leaving over 1,500 people injured and resulting in about 500 deaths.

The most catastrophic typhoon in recent history was Typhoon Yolanda or Haiyan in 2013, causing over 95 billion Philippine pesos in damages. In addition, about seven thousand people were reported dead, and nearly 30 thousand went missing (Statistica.com).

In that same year, over three million people have also been affected by a magnitude seven earthquake on the island of Bohol - just a month before the super typhoon. Another high-intensity earthquake struck the island of Luzon in 2019, with a 6.1 magnitude, leaving several people dead or injured. The Philippines is home to nine active volcanoes, nearly half of which are located on the island of Luzon.

The spending for reducing risk has been one factor helping the Philippines rebound from the aftermath of natural calamities. This is the main reason why the National Disaster Risk Reduction and Management Council (NDRRMC) was created. This government agency has the mandate for rehabilitating society and rebuilding infrastructures in the aftermath of natural disasters. In addition, this agency is also required to assist the Local Government Units (LGUs) in capacitating every community regarding disaster response, to minimize casualties in the event of natural disasters.

The Cagayan State University-Carig Campus is one of the nine (9) satellite campuses of the Cagayan State University and largest among the campuses in terms of faculty and student population. This campus houses the College of Engineering and Architecture which is composed of seven (7) departments including the Civil Engineering Department- the largest department in the College. Disaster Response and Management and Risk Reduction Measures is one of the expertise shared by the department. In fact, some of the CE faculty have undergone series of trainings in Disaster Management facilitated by the NDRRMC.

As part of the mandate of the CSU through its College of Engineering and Architecture-CE Department, this activity is conceptualized to help assist the small communities particularly the Salinong ni San Jose Relocation Site in Taytay Baggao in their Disaster Preparedness Program. This training shall compose of three parts:

1. Introduction to Disaster Preparedness and Disaster Response
2. Disaster Mitigation
3. Disaster Risk Reduction and Management

The first part was already conducted last December 2, 2022 and the topic was discussed by Engr. Leomar Juliano, a full time faculty member of the College. This activity was attended by 50 participants most of which are residents of the relocation site and some barangay officials.

### **Objectives:**

Generally, the training aims to capacitate and inform the residents of the Salinong ni San Jose Relocation Site regarding Disaster Preparedness and Response.

Specifically, the training should be able to:

1. Disseminate information among residents and officials of the community on the importance of disaster preparedness;
2. Disseminate information among residents and officials of the community regarding disaster and causes of natural disasters;
3. Explain the different Mitigation measures available to reduce casualties in the event of disasters;
4. Demonstrate the Dos and Don'ts before, during and after disasters.

### Methodology:

The aim of this project is to conduct training. Participants will be the residents and the officials of barangay Burayoc. Prior to the training proper, interview for the profile of the participants and facilitation of attendance will be conducted.

Standard training sessions will be conducted using variety of training methods and techniques such as slides presentations, group discussion, cooperative learning, and group dynamics and team building. Lecture-discussion type of training will be conducted for each topic. There will be open forum after every lecture. Participants will also conduct an evaluation on the training after the training.

### Training Activities:

| Topic                                                                         | Contents                                                                                                                                                                                                                                                                                                                             | Time Allotment | Training Requirements from participants                                           |

### Training Resources:

Technical services, training materials, PowerPoint presentations, projectors

## Expected Output

This training on Disaster Preparedness was conducted to disseminate information to the beneficiaries including some barangay officials regarding the importance of disaster preparedness and disaster response. This activity could help minimize casualties in the event of natural calamities.

In addition, this activity help inform the participants of the things that they could do before, during and even after a natural calamity.

## Budgetary Requirement:

| Item                  | Q1   | Q2 | Q3 | Q4 | Source of Fund |        |              |
|-----------------------|------|----|----|----|----------------|--------|--------------|
|                       |      |    |    |    | University     | Campus | Other agency |
| Food                  | 3000 |    |    |    |                |        |              |
| Printing of materials | 2000 |    |    |    |                |        |              |

Seminar on Disaster Preparedness

Salinong ni San Jose Relocation Site, Taytay Baggao Cagayan

November 25, 2022

The Cagayan State University being one of the state universities of the Philippines continues to fulfill its mandate by achieving excellence in instruction, conduct of various researches, and involvement in community empowerment through various research-based extension programs. The College of Engineering and Architecture is one of the largest colleges in its Carig Campus in terms of faculty and student population. Throughout the years, the College has launched various extension activities which aims to help Cagayano communities to become resilient and help them attain sustainability.

The College of Engineering and Architecture is assigned to the Resource Support Development project wherein under this project, the college is expected to assist the beneficiaries by providing technical assistance in the improvement of their community. Last year, the college of engineering was able to install solar power system in the area and is expected that more units shall be installed in the coming years. The aforementioned extension program has been awarded with 650,000 budget by the CSU central administration.

Currently, there are almost 60 households residing in the area with four (4) artesian wells where the residents sourced out their water for their day-to-day activities. The community also have their multi-purpose hall donated by private NGO as sanitary bathrooms.

This activity aims to equip the beneficiaries with necessary skills regarding disaster preparedness. Engr. Leomar Juliano of the Civil Engineering Department discussed about the topic followed by Engr. Harley Tolentino who discussed about Residential Electrical Safety.

The training proper was conducted right after the site evaluation. It was discussed or delivered in Ilokano since the beneficiaries are more familiar with the Ilokano dialect.

After the discussion, the attendees are then required to evaluate the activity.

Documentations:

*Engr. Leomar Juliano during the focus Group Discussion with the barangay officials and family heads*

*Group picture with the participants after the event*

*Engr. Juliano discussing his topic about disaster preparedness*

### CSU VISION

CSU is a university with global stature in the arts, culture, agriculture and fisheries, the sciences as well as technological and professional fields.

### CSU MISSION

Cagayan State University shall produce globally competent graduates through excellent instruction, innovative and creative research, responsive public service and productive industry and community engagement.

**COPY OF LECTURE/MODULE**

## **DISASTER PREPAREDNESS**

### **Lecture**

Nov. 25, 2022

#### **What is a Disaster?**

Disaster preparedness consists of a set of measures undertaken in advance by governments, organisations, communities, or individuals to better respond and cope with the immediate aftermath of a disaster, whether it be human-induced or caused by natural hazards. The objective is to reduce the loss of life and livelihoods.

Simple initiatives can go a long way, for instance in training for search and rescue, establishing early warning systems, developing contingency plans, or stockpiling equipment and supplies.

Disaster preparedness plays an important role in building the resilience of communities.

#### **Why is Preparation important?**

With increasing population growth, rapid and unplanned urbanisation, climate change, environmental degradation and widespread poverty, a growing number of people and assets are exposed to disasters.

Moreover, many of these events occur in fragile and conflict-affected states, thus increasing the complexity of crises and overburdening countries experiencing violent conflict or fragile governance.

However, improved practice and response mechanisms save lives and strengthen the countries and communities' ability to reduce the impact of disasters.

Understanding the occurrence and frequency of natural hazards, as well as the risks, vulnerabilities and potential impact on people and assets, helps to improve preparedness.

Instead of providing emergency response only, international efforts should help governments and communities invest in understanding risks and building preparedness capacities for pre-emptive and early action. Disaster preparedness is cost-effective and saves aid money.

### Things to be done

1. With your family and household members, discuss how to prepare and respond to the [types of emergencies](#) that are most likely to happen where you live, learn, work and play.
2. Identify responsibilities for each member of your household and how you will work together as a team.
3. Practice as many elements of your plan as possible.

### 8 Disaster Preparedness Tips

In the event of a natural disaster, having a preparedness plan can be a critical element in helping secure a safe transition out of danger for you, your loved ones and your property. Preparation is key, but it is also important to stay calm and focused during an emergency. If you are ordered to evacuate, do so. If you are not evacuating, use your time wisely to make preparations.

□

**Communicate where you will be.** Contact someone outside the affected area to tell them where you will be for the duration of the event. Business owners should remind employees of their roles in helping to get the business back up and running, and how they will be notified when the facility is open again.

- **Know the warning signs and alert signals for your area.** Stay tuned to your local television or radio station or community alert system for emergency information.
- **Check your emergency survival kit.** Make sure [your emergency survival kit](#) is stocked with essential items and kept in an easily accessible location.
- **Collect emergency building materials.** Depending on the type of disaster, you may want to have emergency materials on hand, such as plywood, sandbags and waterproof tarps.
- **Fuel up your vehicles and equipment.** If you have an [emergency generator](#), make sure you have fresh fuel on hand. Depending on your situation, you may need a supply of extra fuel. If so, be sure to store the spare fuel in an approved container in a safe location. Never use a generator inside or even in a garage. Make sure it is located a safe distance from windows, doors and vents.
- **Be sure you have car chargers for your cell phone, smart phone and other portable devices.** Having car chargers available can assist you in staying in communication with others if your electricity goes out. Do not forget to fully charge devices before a storm.
- **Secure all outdoor objects or move them inside.** Grills, patio furniture and flowerpots are common household items that can become airborne in high winds. Do not use grills inside or store propane tanks inside the house or garage. Business owners should also remember to secure outdoor signage, benches and equipment to help minimize potential damage.

□ **Know how to shut off all utilities.** It is always a good idea to know how to turn off the gas, electricity and water in your home or place of business. If you need to evacuate suddenly, it may be prudent to turn off utilities before leaving. Before doing so, consider equipment that can help minimize damage and should therefore not have utilities interrupted, such as electricity to sump pumps or fire protection equipment.

## CLIMATE CHANGE AND DISASTER

**How Climate Change causes disaster?**

The country's coastal resources are highly vulnerable due to its extensive coastlines. Sea level rise is highly likely in a changing climate, and low-lying islands will face permanent inundation in the future.

**What are the 5 effects of climate change in the Philippines?**

Climate change in the Philippines is having serious impacts such as increased frequency and severity of natural disasters, sea level rise, extreme rainfall, resource shortages, and environmental degradation.

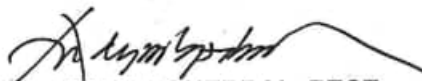

## Why is climate change a disaster risk?

Climate change will therefore affect disaster risks in two ways: firstly, through the likely increase in weather and climate hazards and effects of sea-level rise; and, secondly, through the increases in vulnerability of communities to natural hazards resulting from ecosystem degradation, reductions in water and food

## **Summary of Evaluation**

The training on **Disaster Preparedness** was conducted on November 25, 2022 in Salinong ni San Jose Relocation Site, Taytay Baggao Cagayan

The main objective of this seminar is to equip the participants with knowledge regarding disaster preparedness. This activity was participated by **60** residents of the Relocation Site including barangay officials of barangay Taytay Baggao Cagayan.

The aforementioned training was rated based on the following; the item course content and training schedule, there were four statements given which were rated by the participants as **OUTSTANDING** and the weighted mean for these items were also **OUTSTANDING**. Thus, this indicates that the course content was very important and the training was very timely and the time allotted was just enough for the training.

Under the item timeliness, the participants rated **OUTSTANDING**. Their concerns and issues related to the lecture was also addressed by the speakers.

The speaker's performance was also rated **OUTSTANDING** based on the evaluation instrument.

To summarize the Evaluation, the over-all weighted mean is 5 or **OUTSTANDING**. Thus, this implies the training conducted was very beneficial and timely to the participants.
