TRAINING DESIGN AND COPY OF PROGRAM

Project Title: RESOURCE SUPPORT DEVELOPMENT UNDER THE PAGGURUFUNAN PARA TA PROGRESO
Training Design: SOLID WASTE MANAGEMENT
Date: DECEMBER 2022
Venue: SITIO BURAYOC, BRGY. BASAO GATTARAN CAGAYAN
Proponents: DEPARTMENT OF AGRICULTURAL AND BIOSYSTEMS ENGINEERING

Rationale

Addressing solid waste problems and improvement of the quality of the environment particularly the air and water are the main priority of Secretary Cimatú of the Department of Environment and Natural Resources. This strengthened the importance of the implementation of the RA 9003. RA 9003 or the Ecological Solid Waste Management Act of 2000 provides a systematic, comprehensive and ecological waste management program to ensure the protection of public health and the environment.

Under this law, the Local Government Units are mandated to develop their 10- year Solid Waste Management Plan, close and rehabilitate dumpsites, establish Materials Recovery Facilities and environmentally sound disposal systems. The ecological solid waste management program will assist the LGUs on these goals.

The provisions of technical support in the establishment and operation of Waste to Energy facilities will enhance the sustainability of proper disposal system not only for the different municipalities but even their constituent barangays. This would not only enhance the economic development of the country in general but would also reduce reliance on imported oils and increased in power generation (Department of Environment and Natural Resources, 2019).

The small agta community in Sitio Burayoc comprises of several households. The community is located on a hillside near the Burayoc Falls which is a developing tourist spot. Hence solid waste management is important to maintain cleanliness and avoid pollution in the area.

Additionally, the College of Engineering and Architecture through its Extension Project on Resource Support Development under the Paggurufunan para ta Progreso, will be installing a pump well for potable water source for the community. Proper solid waste management will prevent possible contamination of groundwater.

The focus of this extension activity is to disseminate the importance of solid waste management in general. The topics that will be discussed are the following: Solid Waste Management and its Importance, Agricultural Solid Waste and Management (Composting).

Objectives:

The training aims to educate the Agta Community of Sitio Burayoc on the importance of solid waste management, agricultural solid waste and its management specifically composting.

Methodology

- a. Value Orientation
- b. Lecture
- c. Participative discussion

Expected Output

The participants are expected to be equipped with the basic knowledge on the solid waste management, agricultural solid waste management specifically composting.

Seminar on Solid Waste Management
Sitio Burayoc, Brgy. Basao Gattaran Cagayan
December 2, 2022

The Cagayan State University being one of the state universities of the Philippines continues to fulfill its mandate by achieving excellence in instruction, conduct of various researches, and involvement in community empowerment through various research-based extension programs. The College of Engineering and Architecture is one of the largest colleges in its Carig Campus in terms of faculty and student population. Throughout the years, the College has launched various extension activities which aims to help Cagayano communities to become resilient and help them attain sustainability.

The CSU Carig Campus through the leadership of Engr. Arthur G. Ibanez has launched the extension program entitled "Paggurufunan para ta Progreso". One of the objectives of this extension program is to provide assistance to the Agta Community in Sitio Burayoc, Barangay Basao, Gattaran Cagayan. This extension program is subdivided into three project components namely;

1. Techno-Demo on Food and Non-food products for livelihood;
2. Development of IEC materials;
3. Resource Support Development.

The aforementioned extension program has been awarded with 650,000 budget by the CSU central administration.

Currently, the community beneficiary does not have an organized waste disposal and most of the time, they resort to burning their plastic wastes.

This is the reason why the college of engineering and architecture through its department of Agricultural and Biosystems Engineering who are the experts in Solid Waste Management decided to conduct series of Solid Waste management seminar in the beneficiary community.

Members of the beneficiary community including some barangay officials will be trained in the field of solid waste management specifically on recycling and composting. This training shall compose of two parts:

1. Recycling
2. composting

The training proper was conducted right after the site evaluation. The first topic was discussed by Engr. Roldan Ace Tabangay of the ABE Department and the second part was discussed by Engr. Monico Tenedor, a faculty member of the Chemical Engineering Department. It was discussed or delivered in Ilokano since the beneficiaries are more familiar with the ilokano dialect.

After the discussion, the attendees are then required to evaluate the activity.

- ❖ Solid waste disposal is a common problem in most third-world countries.
- ❖ The government has taken measures to improve the management and operation of solid waste through the implementation of Republic Act 9003 (RA 9003), also called the "Ecological Solid Waste Management Act of 2000".
- ❖ This law manifests the policy of the Philippine government to "adopt a systematic, comprehensive, and ecological solid waste management (SWM) program in the country" and is based on the hierarchy of waste management, which promotes the source reduction, reuse, recycling, and resource recovery (3Rs) of materials.

3

- ❖ SWM Framework Plan is expected to empower the informal sector as a partner of public and private institutions, organizations, and corporations in the promotion and implementation of the 3Rs with the overall objective of alleviating poverty.
- ❖ The city government thrust (LGU) strictly implements the Ecological Solid Waste Management Act of 2000. Baran Gosi generates a substantial number of bio-residues (corn cobs biomass) with promising potentials when properly utilized as renewable sources for industrial, commercial, and household purposes.

4

- ❖ The Cagayan State University, College of Engineering and Architecture (COEA) extension program would like to conduct training-seminar on the **Proper Solid Waste Management** to help minimize or reduce solid waste in the community. In this way, the people of the community will become aware of the importance of solid waste management, the role they need to play and its impact to them, to the community and environment.

5

SPECIFIC OBJECTIVES

- ✓ **Disseminate the importance of proper solid waste management**

Definition of Terms

- ▶ **Solid Waste**
 - Refer to all discarded household, commercial waste, non-hazardous institutional and industrial waste, street sweepings, construction debris, agriculture waste, and other non-hazardous/ non- toxic solid waste
- ▶ **Agricultural waste**
 - refer to waste generated from planting or harvesting of crops, trimming or pruning of plants and wastes or run-off materials from farms or fields
- ▶ **Agricultural Solid Waste**
 - Waste resulting from the production and processing of crops and animals or agricultural products, including manures (at least 20% solids) , pruning and crop residues wherever produced

12

Definition of Terms

► Compost mix

→ mixture of an organic waste with amendment(s) or bulking agent(s) in the proper proportions to promote aerobic microbial activity and growth and to achieve optimum temperatures

► Composting

→ refer to the controlled decomposition of organic matter by microorganisms, mainly bacteria and fungi, into a humus-like product

14

Location

Shall conform with the existing zoning, land use standards and regulations set by Department of Environment and Natural Resources (AO 34 and 35)

other national policies: RA 9003 and PD 1152

- ✓ Should be located so that the prevailing winds tend to disperse and transport the odor away from the residences
- ✓ Should be hidden from public view with landscaping
- ✓ Located in soils with at least 15% clay.
- ✓ → Other soil type: provision of soil sealant

15

Type	Composting Time/ Decomposition	Make & Dimensions	Other characteristics
Windrows	2 - 6 months	triangular piles, 7" high & 14 - 16" wide	Aerated & use specific turning equipment
Aerated Static Pile	6 - 12 weeks	10 - 12" high	mechanically aerated
In- vessel	< 1 week		MSW in chamber or vessel, mixing mechanism aeration, sequenced reactions, controlled moisture, propriety processes

16

Feedstock quality: organic and biodegradable

- No contaminants or foreign matter or hazardous waste

pH: varies throughout the compost mixture and during the various phases of the composting process

- Recommended pH : 5.5 to 8.0
- Optimum pH control should be accomplished by adding alkaline or acidic materials to the initial mixture

Aerobic conditions

- provision of adequate ventilation (at least 5% oxygen)

Temperature control

- minimum of 55 degrees C measured at 1 meter depth

Moisture: maintained at 50% to 60% to nourish the composting bacteria

Particle size: 5 mm to 50 mm

17

Pre and Post Processing in Composting

Pre- processing	Size reduction, screening, magnetic separation
Post - processing	Screening for degradation, curing

Materials Included	Materials Excluded
Fruit & vegetable scraps	Meats
Egg shells	Dairy foods
Coffee grounds with filters	Fats
Tea bags	Oils
Leaves	Grease
Grass	Pet excrement
Wool and cotton rags	Fish scraps
Non- recyclable paper	Diseased plants
	Bones

Summary of Evaluation

The training on **SOLID WASTE MANAGEMENT** was conducted on December 2, 2022 in Sitio Burayoc, Brgy. Basao, Gattaran Cagayan.

The main objective of this seminar is to equip the participants with knowledge regarding importance of Solid Waste Management. This activity was participated by 40 residents of the Agta Community including barangay officials of barangay Basao Gattaran Cagayan.

The aforementioned training was rated based on the following; the item course content and training schedule, there were four statements given which were rated by the participants as **OUTSTANDING** and the weighted mean for these items were also **OUTSTANDING**. Thus, this indicates that the course content was very important and the training was very timely and the time allotted was just enough for the training.

Under the item timeliness, the participants rated **OUTSTANDING**. Their concerns and issues related to the lecture was also addressed by the speakers.

The speaker's performance was also rated **OUTSTANDING** based on the evaluation instrument.

To summarize the Evaluation, the over-all weighted mean is 5 or **OUTSTANDING**. Thus, this implies the training conducted was very beneficial and timely to the participants.
